# CUSTOM CFRP PARTS

ROBO-BRAIDING  
INFUSION | RTM  
BLADDER MOLDING

Some common applications of carbon composite parts include aircraft components such as wings, fuselage, and empennage, as well as sporting goods like bicycles, tennis rackets, and golf clubs. Carbon composite parts can also be found in high-performance automotive components such as body panels, suspension components, and brake systems.

## MATERIALS

- Carbon fiber
- Glass Fiber
- Basalt Fiber
- Aramid
- Linen and other natural fibers
- Epoxy
- Poliurethanes

## TECHNOLOGIES

- Overbraiding
- High Pressure RTM
- Vacuum Infusion
- Pultrusion
- Pull-Braiding
- Pull-Winding
- Pressure bladder molding
